

# The next big thing ... is tiny

## The **new** Aspen Mini Aqua pump

Using the proven functionality of our other mini condensate pumps the Mini Aqua is also incredibly slim in size. Measuring only 28mm in height and 28mm in depth, it provides great installation flexibility in even the smallest of evaporators. The fully potted Aqua is designed to be installed either within the wall mounted evaporator or in the plastic conduit and will reliably pump condensation water from it's reservoir up to a height of 8 metres.

ACTUAL SIZE WITHIN 62 X 65mm  
CONDUIT WITH STANDARD 3/8"  
& 5/8" INSULATED PIPE
