

Technical Specification | Reclaim Units

EcoWarrior

Part No: 230V FP2566 / 110V FP2757

ASPEN-07/08

Dimensions:

Height: 358mm
 Width: 395mm
 Depth: 275mm
 Weight: 12.5kg

Power Supply:

230V & 110V models available

Other Features:

- Push/pull: up to 320kgs/hr
- 500W Oil-less compressor
- High pressure cut out of 410PSIG
- Large condenser and high air flow
- Suitable for most types of refrigerant, both liquid and vapour
- Purge facility
- Lightweight at under 13kg
- Rugged, moulded case
- Ergonomic carrying handle

Performance:

- Liquid recovery rate: up to 80kgs/hr
- Vapour recovery rate: up to 30kgs/hr

The EcoWarrior is suitable for refrigerants:

R-11, R-12, R-22, R-113, R-114, R-123, R-134A, R-404, R-407C, R-410A, R-500, R-502

IMPORTANT: NOT FOR USE WITH EXPLOSIVE GASSES

Highly affordable with no frills on the outside, it's extremely efficient on the inside where it matters.

With a 500W oil-less compressor, a large condenser and high airflow, the EcoWarrior offers a quick, easy to use solution for reclaiming refrigerant gases, which is not only an environmental necessity but a legal requirement.

Suitable for most types of refrigerant, the unit has a liquid recovery rate of up to 80kgs/hr, a vapour recovery rate of up to 30kgs/hr, with a purge facility. Lightweight at under 13kg, the EcoWarrior has a clear display panel and a rugged, moulded case with a built-in carry handle to make your life easier.
